

# Hand ink proofer

The hand proofer, with its rubber transfer roll and a spring-adjustable engraved anilox roll, is widely used for flexography and gravure ink proofing on all kinds of substrates, such as plastic films, metallic foils, paper, board, etc. What you see on the proof is what will print on press. Since proofer rolls are available in a full range of screens to duplicate your press requirements, you can make any changes in ink or screen before you get to the pressroom.

Available anilox rollers:  
60, 80, 100, 120, 140, 160, 180, 200, 220, 250 or 300 LPI

## Features

- Excellent repeatability
- Adjustable pressure
- Easy to use, easy to clean

## Technical details

|                |                |
|----------------|----------------|
